**Subject:** Fw: Invitation to Passaic River Community Advisory Group (CAG)

Yesterday, Ella Filippone asked me to formally invite Cement Lock to make a presentation at the March CAG meeting - I hope you don't mind, I left a voice mail message and the following e-mail on behalf of the CAG.

----- Forwarded by Alice Yeh/R2/USEPA/US on 02/09/2011 10:19 AM -----

**Subject:** Invitation to Passaic River Community Advisory Group (CAG)

I wanted to make sure that you had received my voice mail message to you earlier this morning, so I thought I would also send an e-mail.

On behalf of the Passaic River Community Advisory Group (CAG), I would like to invite you or your representative to make a presentation on the Cement Lock technology at the March CAG meeting. The CAG is a group of local residents, environmental groups, municipalities, business groups and other stakeholders that was formed to provide advice and recommendations to the EPA on the clean-up of the Lower Passaic River. The CAG has been debating the dredging and capping alternatives, as well as dredged material disposal options, being evaluated for the clean-up of the lower 8 miles of the river. The CAG would like to evaluate the effectiveness and viability of Cement Lock as a dredged material treatment/disposal option for the Passaic River. At the March meeting, another decontamination technology, Biogenesis, will also be making a presentation.

The March meeting will be on March 10, 2011 at 6-9pm, at the St. James Church (142 Jefferson Street, Newark, NJ). Please let me know if you are interested in sending representatives to make a presentation on your technology.

Please call me with any questions at 212-637-4427.
